This edited volume addresses the issue of threat inflation in American foreign policy and domestic politics. The Bush administration's aggressive campaign to build public support for an invasion of Iraq reheated fears about the president's ability to manipulate the public, and many charged the administration with 'threat inflation', duping the news media and misleading the public into supporting the war under false pretences. Presenting the latest research, these essays seek to answer the question of why threat inflation occurs and when it will be successful. Simply defined, it is the effort by elites to create concern for a threat that goes beyond the scope and urgency that disinterested analysis would justify. More broadly, the process concerns how elites view threats, the political uses of threat framing among competing elites, and how the public interprets and perceives threats via the news media. The war with Iraq gets special attention in this volume, along with the 'War on Terror'. Although many believe that the Bush administration successfully inflated the Iraq threat, there is not a neat consensus about why this was successful. Through both theoretical contributions and case studies, this book showcases the four major explanations of threat inflation -- realism, domestic politics, psychology, and constructivism -- and makes them confront one another directly. The result is a richer appreciation of this important dynamic in US politics and foreign policy, present and future. This book will be of much interests to students of US foreign and national security policy, international security, strategic studies and IR in general. Trevor Thrall is Assistant Professor of Political Science and directs the Master of Public Policy program at the University of Michigan - Dearborn. Jane Kelleet Cramer is an Assistant Professor of Political Science at the University of Oregon.

Civil-military cooperation has always been a key factor in both peace and conflict situations, and is vital in today's political climate. This indispensable volume analyzes the various types of civil-military cooperation across different settings and contexts, to include humanitarian operations such as emergency relief following tsunami, earthquakes and refugee crises, as well as stability and reconstruction operations such as those in Afghanistan and the Democratic Republic of Congo. The book contains contributions from both senior academics and practitioners such as military officers and humanitarian personnel and discusses the benefits and logistics of civil-military cooperation. It closes with recommendations that will be of value to both academics and practitioners, making it a must read for anyone interested or involved in these operations.

The major aim of Cyberspace and the State is to provide conceptual orientation on the new strategic environment of the Information Age. It seeks to restore the equilibrium of policy-makers which has been disturbed by recent cyber scares, as well as to bring clarity to academic debate on the subject particularly in the fields of politics and international relations, war and strategic studies. Its main chapters explore the impact of cyberspace upon the most central aspects of statehood and the state system?power, sovereignty, war, and dominion. It is concerned equally with practice as with theory and may be read in that sense as having two halves.

Every year, the U.S. Army must select from an applicant pool in the hundreds of thousands to meet annual enlistment targets, currently numbering in the tens of thousands of new soldiers. A critical component of the selection process for enlisted service members is the formal assessments administered to applicants to determine their performance potential. Attrition for the U.S. military is hugely expensive. Every recruit that does not make it through basic training or beyond a first enlistment costs hundreds of thousands of dollars. Academic and other professional settings suffer similar losses when the wrong individuals are accepted into the wrong schools and programs or jobs and companies. Picking the right people from the start is becoming increasingly important in today's economy and in response to the growing numbers of applicants. Beyond cognitive tests of ability, what other attributes should selectors be considering to know whether an individual has the talent and the capability to perform as well as the mental and psychological drive to succeed? Measuring Human Capabilities: An Agenda for Basic Research on the Assessment of Individual and Group Performance Potential for Military Accession examines promising emerging theoretical, technological, and statistical advances that could provide scientifically valid new approaches and measurement capabilities to assess human capability. This report considers the basic research necessary to maximize the efficiency, accuracy, and effective use of human capability measures in the military's selection and initial occupational assignment process. The research recommendations of Measuring Human Capabilities will identify ways to supplement the Army's enlisted soldier accession system with additional predictors of individual and collective performance. Although the primary audience for this report is the U.S. military, this book will be of interest to researchers of psychometrics, personnel selection and testing, team dynamics, cognitive ability, and measurement methods and technologies. Professionals interested in of the foundational science behind academic testing, job selection, and human resources management will also find this report of interest.

This comprehensive new book provides up-to-date information on many types of Asian prepared foods-their origin, preparation methods, processing principles, technical innovation, quality factors, nutritional values, and market potential. Written by experts who specialize in the field, it includes information on Asian dietary habits and the health significance of Asian diets. Asian Foods also discusses differences in preparations and varieties among diverse Asian ethnic groups and regions, cultural aspects associated with the consumption of the products, and the market status or potential of more than 400 varieties of Asian foods. These foods include products made from rice, wheat, other starchy grains, soybeans, meat, poultry, fish, fruits, and vegetables, as well as functional foods and alcoholic beverages. This timely book will be of interest to food professionals in product development, dietitians interested in Asian diets and dietary habits, business developers seeking market potential for Asian prepared foods, and food science and human nutrition students who need supplemental information.

Topic-wise Bank PO/ Clerk Prelim & Mains Solved Papers Quantitative Aptitude consists of past solved papers of Bank Exams - IBPS PO, IBPS Clerk, SBI PO, SBI Clerk and Specialist Officer from 2010 to 2016. • The coverage of the papers has been kept RECENT (2010 to 2016) as they actually reflect the changed pattern of the Banking exams. In the end, this book will make the aspirants competent enough to crack the uncertainty of success in the Entrance Examination. • The strength of the book lies in the originality of its question papers and Errorless Solutions. The solution of each and every question is provided in detail (step-by-step) so as to provide 100% concept clarity to the students.

This volume develops information strategy as a construct equal in importance to military strategy as an influential tool of statecraft. John Arquilla and Douglas A. Borer explore three principal themes: the rise of the 'information domain' and information strategy as an equal partner alongside traditional military strategy the need to consider the organizational implications of information strategy the realm of what has been called 'information operations' (IO) - the building blocks of information strategy - has been too narrowly depicted and must be both broadened and deepened. Information Strategy and Warfare will be essential reading for students and practitioners of information strategy, as well as scholars of security studies and military strategy in general.

The National Talent Search Examination (NTSE) is conducted For Class 10 th students every year in order to identify and nurture talented students of the nation. The construction of a new Latin library between the end of the Republic and the Augustan Principate was anything but an inhibiting factor. The literary flourishing of the Flavian age shows that awareness of this canon rather stimulated creative tension. In the changing socio-cultural context, daring innovations transform the genres of poetry and prose. This volume, which collects papers by influential scholars of early Imperial literature, sheds light on the productive dynamics of the ancient genre system and can also offer insightful perspectives to a non-classicist readership.

• The thoroughly revised & updated 6th edition of "Comprehensive Guide to IBPS-CWE Bank PO Exam" has been designed specially for the CWE Bank PO stage 1 & 2 of the exam. • A chapter on Sentence Exclusion has been introduced as asked in the 2016 PO Mains Exam. • The book covers all the sections of the Preliminary & Main PO exam - English Language, Quantitative Aptitude, Reasoning Ability, Computer Aptitude, and Banking Knowledge & General Awareness. • The book provides well illustrated theory with exhaustive fully solved examples for learning.
