Desert - Desert - Environment: Deserts are varied and variable environments, and it is impossible to arrive at a concise definition that satisfies every case. However, their most fundamental characteristic is a shortage of available moisture for plants, resulting from an imbalance between precipitation and evapotranspiration.

Deserts and Desert Environments | Wiley

Desert, any large, extremely dry area of land with sparse vegetation. It is one of Earth ' s major types of ecosystems, supporting a community of plants and animals specially adapted to the harsh environment. In deserts, trees are usually absent, and shrubs or herbaceous plants provide only very incomplete ground cover.

desert | Definition, Climate, Animals, Plants, & Types ...

A lone tree stands highlighted against a sand dune in Africa's Namib Desert. Because the desert is so dry, many well preserved human artifacts and ancient fossils can be found there.

components of drylands.

Deserts and Desert Environments / Edition 1 by Julie J ...

Deserts are mostly found in low altitude (for example, Sahara and those in Mexico) though there are many found at high altitudes such as deserts in West Asia, Utah, and Nevada in the US. They have special vegetation and have an abundance of animals, especially reptiles. Furthermore, the soil in deserts is fertile and supports vegetation.

Deserts And Desert Environments [PDF]

A desert is a barren area of landscape where little precipitation occurs and, consequently, living conditions are hostile for plant and animal life. The lack of vegetation exposes the unprotected surface of the ground to the processes of denudation. About one-third of the land surface of the world is arid or semi-arid. This includes much of the polar regions, where little precipitation occurs ...
