(a) The differential equation is  $dP/dt = 0.3P(1 - P/2500) - 100$ .  
The equilibrium solutions of this equation correspond to the values of  $P$  for which  $dP/dt = 0$  for all  $t$ .  
Using the quadratic...

The general solution of the differential equation  $dr/dt = -\lambda r$  is  $r(t) = r_0 e^{-\lambda t}$  where  $r(0) = r_0$  is the initial amount. (a) We have  $r(t) = r_0 e^{-\lambda t}$  and  $r(5230) = r_0/2$ . Thus  $r_0/2 = r_0 e^{-\lambda \cdot 5230}$

## Textbook Solutions . . .

Manual  
How to solve separable differential equations To find explicit solutions of separable differential equations, we use a technique familiar from calculus. To illustrate the method, consider the differential equation  $dy/dt = 2y$ . There is a temptation to solve this equation by simply integrating both sides of the equation with respect to  $t$ .

Student Solutions Manual for  
Blanchard/Devaney/Hall's ...  
Students learn how differential  
equations are formulated and  
interpret their meaning to applied  
models. A three-pronged  
qualitative, numeric, and analytic  
approach stresses how to  
visualize differential equations  
geometrically, use technology to  
investigate the behavior of  
solutions, and predict the  
behavior of solutions as they  
apply to models.

(PDF) Solutions Manual for Differential Equations and ...

As for the solution manual itself it is pretty standard. It has the solutions to the odd problems. It walks you through the steps, and thankfully, unlike many solution manuals does not skip a lot of steps. When they do, it is something that is really basic that a student taking differential equations should be able to follow.
