The fish processing industry is still far from the levels of scientific and technological development that characterize other food processing operations. It has also been slow in finding uses for by-products and processing wastes, compared with the meat and poultry industries. Spotlighting the peculiar forces that drove Americans away from quality, durability, and craftsmanship and towards quantity, quantity, and more quantity, Ellen Ruppel Shell traces the rise of the bargain through our current big-box profusion to expose the astronomically high cost of cheap.
